Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 18-20, drawn to a method and apparatus for analyzing sequences of atomic groups, classified in class 712, subclass 27.
- II. Claims 13-15 and 21-22, drawn to a method and apparatus for analyzing three-dimensional structures, classified in class 702, subclass 27.
- III. Claims 16-17 and 23, drawn to drawn to a method and apparatus for analyzing three-dimensional structures comprising steps/means different from those of Group II, classified in class 702, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Invention I recites different steps/means than either of Inventions II or III and is directed to a different result (effect). Inventions II and II appear to be directed to similar results, but recite different steps/means which require a different search. The method of any one Group can be performed without knowledge of or reference to the steps or results of any other method, therefore each method is separate and distinct.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, the search for Group III is not required for Groups I or II, and the search for Group II is not required for Groups I or III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
